1 out of 3 kids is bullied. With the prevalence of the Internet, more than 50% of kids are being cyberbullying as well. The unfortunate reality is that nearly every child is bullied at some point in their lives.

It is important for parents to teach their children how to avoid bullying, how to deal with it if it occurs, and how to maintain a positive self-esteem. It is also important for parents to know how to handle a situation if their child IS the bully.
